

PolySeam Liner System

Patent Pending
PolySeam

Latest Product Offering

With the introduction of our newest product blend using extremely durable XR-5 and Polyurea Seaming System, we have created a fast and cost effective alternative liner option which can be installed in the most extreme conditions.

- Patent Pending HDPE PolySeam is delivered to your site and then cut to desired length for seaming application
- Sections are then seamed into place using traditional welding methods.

- Completed Tank using PolySeam Lining System
- Once HDPE transition strip is in place, existing liner system is spray seamed to the containment penetrations.
